Total Window Area	
Total Decorative Window Area	
% of Decorated Glass	

Windows of same performance may be grouped together. For window film and/or screen, group like windows by direction. Decorative glass may include door glass, side lights, skylights etc.

High performance windows must be labeled by the National Fenestration Rating Council (NFRC) as achieving a Solar Heat Gain Coefficient (SHGC) ≤ .50 and a U-value < .75 Window film and/or window screen must have a SHGC of ≤ 0.40 or a SC (Shading Coefficient) of ≤ 0.45 and must be installed on all east, west and south facing windows. Factory tint windows meeting the SHGC of ≤ 0.40 or a SC of ≤ 0.45 must also be rated by NFRC. Decorative glass is exempt provided its total area does not exceed 15% of the total glass area of the home. If performance of the window is in doubt, builder has the burdon of proof in verification of window performance.
